VOL. 11 NO. 45 | Lancaster Farming, Saturday, October 8, 1966 | $2 Per Year

County ACP Funds Reduced For 1967

Funds allocated to Lancaster County for the 1967 Agricultural Conservation Program (ACP) were reduced $2000 from last year's $112,000 allocation, Miss Dorothy Y. Neel, manager of the county Agricultural Stabilization & Conservation office, said this week.

She added that the state allocation of $4,620,000 had been reduced by $35,000 from last year's total

The cost-share conservation practices on which ACP assistance will be available in Lancaster County will be announced following a program development meeting on October 19, Miss Neal stated The committee developing the local program consists of representatives of the County Extension Service, Farmers Home Administration, Soil Conservation Service, State Forester, Soil & Water Conservation District directors, and ASCS.

Nationally, the amount distributed was the same as last year—$209,730,000, and will be spread among more than a million farmers in establishing or improving a variety of conservation measures on their farms

Based on all cost-share conservation measures applied in previous years, USDA estimates farmers and ranchers will carry out under ACP in 1967 about 60 different kinds

NEW POULTRY PRINCESS — Ruth Konhaus (seated) of Mechanicsburg, Pa., receives congratulations upon her selection as Northeastern Poultry Producers Council (NEPPCO) Poultry Princess of 1967 from Mrs. Carl G. Sempier, who won the Miss America title as Evelyn Ay in 1954 and served as a NEPPCO contest judge; 1966 Princess Connie Hoffman, of Catawissa; and radio-television star Phil Sheridan, of Philadelphia, who served as master of ceremonies during the 1967 Poultry Princess Pageant.

14-State Poultry Princess Title To Ruth Konhaus

HARRISBURG — The high spot of the annual Northeastern Poultry Producers annual banquet here Wednesday night came when the judges paraded back into the ballroom with sealed envelopes containing the names of the 1966 NEPPCO Poultry Princess, and the first and second runnersup.

Master of ceremonies Phil Sheridan opened the winning envelope and announced that Ruth Konhaus of Mechanicsburg was the new NEPPCO Princess The petite brunette, formerly Pennsylvania Poultry Queen, increased her kingdom from one state to 14 with the addition of her new title.

Miss Konhaus, 19-year-old daughter of Mr and Mrs Paul A Konhaus, was sponsored by the D E Horn Company of York She is now in her senior year at Penn State University. When asked by "MC" Sheridan whether she intended following in her father's footsteps, growing turkeys, the Princess said she had "other plans".

Miss Konhaus received a $500 U S. Savings Bond for

NEPPCO Sets Program To List Jobs & Working Conditions In Area

HARRISBURG — A program to stimulate job placement and to present an accurate picture of wage and hour conditions in the poultry industry throughout the 14-state northeastern area was set in motion this week by industry leaders here.

Directors of the Northeastern Poultry Producers Council (NEPPCO) adopted plans for a job referral service and for a complete survey of salary and working conditions in the 14-state area at the opening of the annual NEPPCO Exposition and convention in the huge Farm Show Building.

Under the NEPPCO job referral program, forms will be distributed to prospective employees to learn of their experience and to prospective employers for listing their requirements NEPPCO will coordinate the entire program.

All members of the NEPP-

Best Carcass At Swine Show To Arnold Gilt

A 206-pound Yorkshire gilt entered by Leon Arnold, Lebanon County, topped the fall carcass show sponsored by the Lancaster County Swine Producers Association and held in conjunction with the West Lampeter Community Fair

The two-part show — on-foot evaluation by spectators Thursday night September 29, followed by carcass analysis of 16 hogs on Saturday, has become a regular event in which association members can gain a better understanding of their breeding and feeding programs

Of the sixteen hogs cut up and measured for backfat, ham-loin percentage, and loin-eye size, half cut better than 40 percent of their carcass

Babcock Plans New Hatchery In Lititz Area

Babcock Hatchery, Inc., presently in rented quarters at Lititz R3, began work Tuesday on a new, $100,000 hatchery building in the Lititz R2 area, it was learned this week.

The planned facilities will house office and hatchery, and will increase the firm's present saleable chick hatching capacity of 42,500 per week to 56,000, it was reported by the company office.

Present plans call for the firm to move into the new plant about December 1, and to begin hatching chicks there about the first of January.

The local company, a branch of Babcock, Inc of Ithaca, NY, is managed by Russell Mease.

1966 Estimated Pa. Seedleaf Crop & Carryover Stocks Down 7%

The 1966 estimated Pennsylvania Seedleaf tobacco crop, plus amounts on hand in stores and warehouses, will total approximately 167½ million pounds for the 1966-67 marketing year The U S Department of Agriculture's quarterly tobacco summary released this week said this would amount to a seven percent drop from last year's supply, nine percent below the long time high of two years ago

According to the report, Pennsylvania filler tobacco acreage is about seven percent below the 1965 level, and is the smallest since 1952.

As of September 1st, the crop was estimated at 42½ million pounds This would be one-sixth less than last year, and the smallest crop since 1957

1965-66 domestic use of Pennsylvania filler tobacco was estimated at 55 million pounds, a ¾-million-pound increase over the 1964-65 level, and six

Farm Price Index At Best Level Since '53

Seasonal advances in milk and egg prices pushed the September index of prices received to the highest level since 1953, according to the Pennsylvania Crop Reporting Service The index for meat animals declined slightly, primarily a result of lower hog prices The only other declines were for fruit and vegetables, which were down seasonally from the previous month

With the exception of hog and lamb prices, meat animal prices remained steady to slightly higher Steers and heifers increased 30 cents to $24.40, cows for slaughter ad-

Freight Rate Fight Not Over, Says RR Rep.

HARRISBURG — Lower eastern rail freight rates on feedstuffs, shot down by the federal Interstate Commerce Commission last week, will have to come "eventually," according to Paul W Olson, manager of agricultural industry services for the New York Central System

Olson analyzed the background of the recent unsuccessful effort to secure lower freight rates, which he said, could have saved poultry producers from $2 50 to $4 00 per ton of feed, during the opening educational session of the 29th annual exposition of the Northeastern Poultry Producers Council (NEPPCO) at the

Weekly Poultry Report

Eastern Pennsylvania And New Jersey
WEEKLY SUMMARY

LIVE HENS

Prices held unchanged on light hens. Overall supplies increased sharply and offerings were adequate to fully ample for a continued good buying interest. Heavy hens were more readily available and ample for a spotty demand that ranged from slow to good. Prices paid @farms: light hens 7-9, mostly 8-8½; heavy hens 15-16, mostly 15.

Fogelsville

October 4, 1966

(Prices paid dock weights, cents per lb., except where noted.)

Hens, Light 8-11½, mostly 8-9; Hens, Heavy 9-19, mostly 11-15; Pullets 16-33, mostly 30-33; Roasters 12-28½, mostly 24-27; Turkeys, Toms 18-24, mostly 22-24; Turkeys, Hens 27½-34; Rabbits 20-33½, mostly 28-32; Guineas 55-62½, Pigeons (per pair) 67½-120, mostly 72½-75.

Total coops sold 895

Eastern Shore Exchange
WEEKLY SUMMARY

Lot-average broiler and fryer live prices advanced more than ½ cent this week to average 14.85 cents per lb.

Prices paid during the week ranged from a high of 15.8 cents to 14.0 cents per lb.

Sales were down more than 100,000 head for a total of 1,085,200 head.

Delmarva

October 7, 1966

Live supplies and sizes adequate for needs with live broiler and fryer prices ranging from 14.0 to 15.1 cents per lb.

Ready-to-cook demand slow for this week, but prospects for next week fairly good.

Estimated slaughter for today and Saturday, 901,800 head compared to 948,000 head last weekend.

From Where We Stand . . .

Not For Sale

It would seem from some of the campaign expenditures one hears of in Pennsylvania these days that the governorship of the state is up for sale to the highest bidder. And the highest bidder has to be Milton Shapp, Philadelphia industrialist. He doesn't care what it costs — he'll buy it.

When it comes to money, Shapp thinks Texas-style. Remember the story about the Texan who met up with an enthusiastic young Kentuckian who bragged there was enough gold in Fort Knox, Kentucky, to build a wall three-foot-high all around the state of Texas? The Texan just sat back and drawled, "Well, son, you go right ahead and build that wall. When you're finished I'll come out and look it over. If I like it, I'll buy it."

Shapp has been looking over the Governor's chair at Harrisburg for some time. He likes it, and if money will buy it, he'll pay the price.

We passed within one block of the State Capitol building one day this week, and being a bit concerned about a future as a citizen of a "store boughten" state, we drove by to look over the property. We are happy to assure you, friends, that there is no "For Sale" sign on the Capitol lawn.

But Milton Shapp may be a hard man to convince. He wants the Governor's job so badly that, reportedly, he and his wife sold 500,000 shares of Shapp's Jerrold Corp. — market value $9 million — to finance the campaign. He proved he meant business when he dropped $1 4 million in all the right places to buy the Democratic nomination.

The Democrats didn't take him seriously before the primary election. The Republicans had better take him seriously before the main event in November!

In our opinion, Shapp is one of the most dangerous figures to emerge on the political scene in many a year. If he can buy Pennsylvania, what next? Why should he be content with building just one monument to Milton Shapp? Why not 52 monuments? Why not buy the whole package — the White House?

And let's not kid ourselves; if he'll spend millions of dollars of his own money to become "Emperor" of Pennsylvania, can't you imagine what he'll do with our money if he gets the job? He's already given considerable indication of his plans in that direction.

We're not happy with Ray Shafer's wooing of labor leaders with his promise to oppose a "Right to work" law for Pennsylvania. However, we think Shafer is honest, capable, and well-prepared to continue Scranton's sound fiscal and social policies designed to keep the Commonwealth moving in its present positive direction.

We think Milton Shapp is about as opposite from that ideal as any one man could possibly be. But make no mistake about it — Shapp **could** win.

If he succeeds in buying the governorship, the price he pays will be peanuts compared to the price Pennsylvania will pay during the next four years.

A vote **for** Ray Shafer is a vote **against** Milton Shapp. A vote **for** Shafer can be your way of telling all would-be public office buyers that the governorship of Pennsylvania is **not** for sale. Not this year, nor any other.

Where There's Fire There's Carelessness

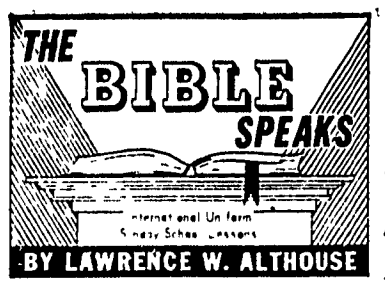
You'd think no one really had to be reminded of the potential danger which lurks, always ready to strike, in the flickering flame of **FIRE.**

But the grim statistics tell otherwise — a fire a minute every hour of the day somewhere in America; and one person, somewhere, dies from fire every 80 minutes.

So, once each year Fire Prevention Week is "celebrated". This year it is October 9-15, and you'll get reminders from every quarter. "What to do in case of fire"; "What to do **before** fire strikes"; "Have a plan for your family to escape in case of fire" — and so on.

But the best insurance in the world against fire is YOU. Most fires, as auto accidents, are caused by carelessness on someone's part. During Fire Prevention Week take a few moments to take stock of your "fireproofness".

Is your heating system in tip-top safe shop? How about that electrical wiring you've been meaning to fix for so long? Are your attic and cellar stairs free of debris that could feed a fire, and possibly trap you or some member of your family? When you trust your children to a baby sitter's care do you instruct her what to do in case of fire? Do you know how to reach your local fire department without delay? There are any number of things you can do to improve your chances of survival when fire strikes — better yet, to keep the foul breath of fire from your threshold. Look around your property now; you're sure to see what we mean.



Atheism Of Deeds

Lesson For October 9, 1966

Background Scripture Isaiah 5 28 1 22.

Devotional Reading Galatians 5 16 25.

Jesus said it and history proves it: 'A prophet is not without honor except in his own country and in his own house" (Matthew 13.57 RSV) He might well have added: " . . . and in his own age!"

Rev. Althouse

Prophets are usually greatly admired . . after they are dead! The dead prophets are revered while the live prophets are ignored or condemned. Today it costs us nothing to lionize men like Isaiah, Jeremiah, and Amos. Yet few of us could have tolerated them if we lived during their periods of ministry.

John Ruskin has said, "To see clearly is poetry, prophecy, and religion, all in one." The Hebrew prophet was all three of these: poet, prophet, and religionist His task was to "see clearly," particularly at those times when the vision of others was clouded and limited.

To Interpret Present

We too often think of the prophet as a man who sees grand visions and hears heavenly voices. Prophets often have experiences such as this, to be sure, but their eyes were fixed not only upon the future, but also upon the present. God gives them the gift to rightly see and understand the meaning of present conditions and diagnose their implications for the future.

This explains, of course, the unpopularity of the living prophet It is possible to tolerate dire predictions for the distant future, but when the prophet begins to analyze our present conditions he finds that he has struck a vital nerve!

Isaiah discovered this in his own ministry. He had a God-given gift for seeing things clearly and when he spoke to his contemporaries about what he saw, they could scarcely contain their wrath. They much rather would have had him speculate on the future then to see so clearly and openly the mess of the present.

As Though Dead Or Away

What was it he saw so clearly that upset them? You are living like people who believe that God is either dead or away! Their enemies claimed that their God was dead, unable to help them. But you people, he said, are living that way. Their atheism of deeds is just as blasphemous as some people's atheism of words and ideas.

If we could overcome our fascination with the prophets of other times and listen to the prophets of our own day, we might find that they are saying much the same thing to us. Perhaps it is true that we too, like the people to whom Isaiah was sent, speak like committed Christians and live like convinced atheists.

Many of us today find ourselves upset because a small group of theologians is saying that "God is dead." We find it shocking that some should brazenly proclaim that there no longer is a God. Yet maybe all of us ought to ask ourselves whether our lives don't make the proclamation to those around us. One non-Christian observer remarked that the 'Death of God" theologians are only saying what many Christians have been indicating for a long time.

We don't like to hear that kind of analysis of our present, do we? The thundering prophet looks attractive in retrospect, but not in the present. It is one thing for Isaiah to tell his people that they are insincere and superficial, that they have traded their monotheism for moneytheism, but for a contemporary prophet to tell us that about our society, ... well, we feel as threatened as the prophets' contemporaries.

The Christian atheist does not say "God is dead!"; he just acts that way. What about you?

Champion Hog Brings 62½c At Lampeter Sale

What's a champion hog worth? John Welk, Strasburg R1, who has shown and consigned the top individual hog at the Lampeter Fair for the past two years, found that this year's champ was worth about $11 more than last year's

The 235-pound Yorkshire barrow was bought by the First National Bank of Strasburg for $62 50 per hundredweight, or, $146.87 Last year's champion sold for $135

The 19th annual Garden Spot FFA Chapter fat hog sale, held last Friday night in conjunction with the West Lampeter Community Fair, yielded an average price (including the champion) of 30 7 cents per pound on the 14 lots consigned lots

Ezra Martin, Lancaster, bought the champion pen of two consigned by Harold Welk, Strasburg R1, for $38 a hundredweight, or $165 30 The champion pen of four, shown by chapter president Robert Weaver, Strasburg R1, went to Kunzler and Co Inc, for $29 - 75 a hundredweight

Only one lot of the 14 consigned was sold at $27 50 the rest were $28 and up

Other buyers and supporters of the sale were New Holland Sales Stables, Thomas Butcher Shop, Willow Street, Vintage Sales Stables, and Martin Breneman, 633 Beaver Valley Pike.

Hess Bros. Win 5 Blue Ribbons At Egg Show

The Ephrata egg marketing firm of Hess Bros, Inc, won five blue ribbons in what is billed as the nation's largest egg show at the NEPPCO (Northeastern Poultry Producers Council) Show Tuesday, but lost the title to a Virginia firm

Hess won ribbons in Class 1, eggs prepared for distribution to consumers

Other Class 1 ribbon winners from Lancaster County were Plain & Fancy Egg Ranch Inc, Elizabethtown R3, L M Sheaffer, Ephrata and Clay Reese Co, Lancaster

Plain & Fancy placed second in Class 2, eggs prepared for wholesalers, in the large white egg class I R Musser, Mount Joy, also placed in that category

A total of 62 farms and egg packing firms competed in the 14-state show at the Farm Show Building, Harrisburg

MUSHROOMS

Mushrooms, toadstools, or puffballs in your lawn are fruits of various fungi and may be difficult to eradicate until all wood or organic matter on which they are feeding is decomposed, say extension plant pathologists at Penn State University.

Now Is The Time . . .

By Max Smith, Lancaster County Agent

To Carefully Raise Calves

Dairymen are urged to give special attention to the raising of their best heifer calves for herd replacements With the existing trend in the dairy production industry and in view of the strong demand for herd replacements, it is advisable to raise your own rather than try to buy them. With the many good breeding herds in operation throughout the county, we should not only produce enough animals for the local herds, but supply top animals to dairymen from other areas Special care for these young calves the first year of their lives will enable them to grow into large cows that are always in strong demand Sunny, clean, dry draft-free stalls or pens are strongly recommended.

SMITH

To Prepare Sheep For Winter

Sheep producers should be preparing their flocks for winter quarters This means protection from the weather and an outside exercise lot for daily exercise Liberal amounts of high quality legume hay should be the foundation for the winter feeding program, limited grain may be fed closer to lambing time Drenching the animals for stomach worms both in the fall and in the spring is strongly recommended, the providing of the salt-phenothiazine mixture before them at all times is not sufficient because some ewes may not consume enough of this mixture to control worms. Good quality grass or corn silage may be fed to the ewe flock in place of some of the hay, extra care should be exercised to be sure the silage is not moldy or fed when frozen

To Plan For Livestock Tours

Livestock producers are informed of the annual Livestock Tour to be held on Tuesday, October 25 This one-day tour will be into the Baltimore, Maryland area, to observe livestock farms a tool manufacturing plant, and an automobile assembly plant Cattle and hog producers are urged to mark this date on their schedule and be alert for further announcement and reservation procedures.

● Freight Rates

(Continued from Page 1)

Farm Show Building here.

"We may have lost the battle but we will not lose the war," Olson told the group. "Eventually the (reduced) freight rate will become the order of the day. We only hope that there will be a viable agricultural commodity left in the Northeast to benefit from the adjustment."

Olson stated that even the objectors to the revised rate "do not feel they can stymie these mileage rates forever, but instead feel they are 'buying time'.

He noted that the New York Central System loses some $3,000,000 annually on the handling of grain and grain products, and shares the economic concern of Northeastern producers in obtaining a more realistic, lower rate for handling these products.

"It is the consumer, the northeastern poultry producer and the eastern railroads who really feel the burden of the . . . legal objections to block the rates which would have been effective October 1," he said.

The ICC postponed the hearing on the matter of such a rate adjustment indefinitely last week for "further study" of the railroads' rate structure.

● Jobs

(Continued from Page 1)

CO organization will be invited to take part in the wage and hour survey. NEPPCO will detail job classifications, conduct the survey and analyze average wages paid in the poultry industry, hours worked, fringe benefits and other pertinent data. A summarization of this data is expected to be extremely helpful to employers throughout the Northeastern poultry industry.

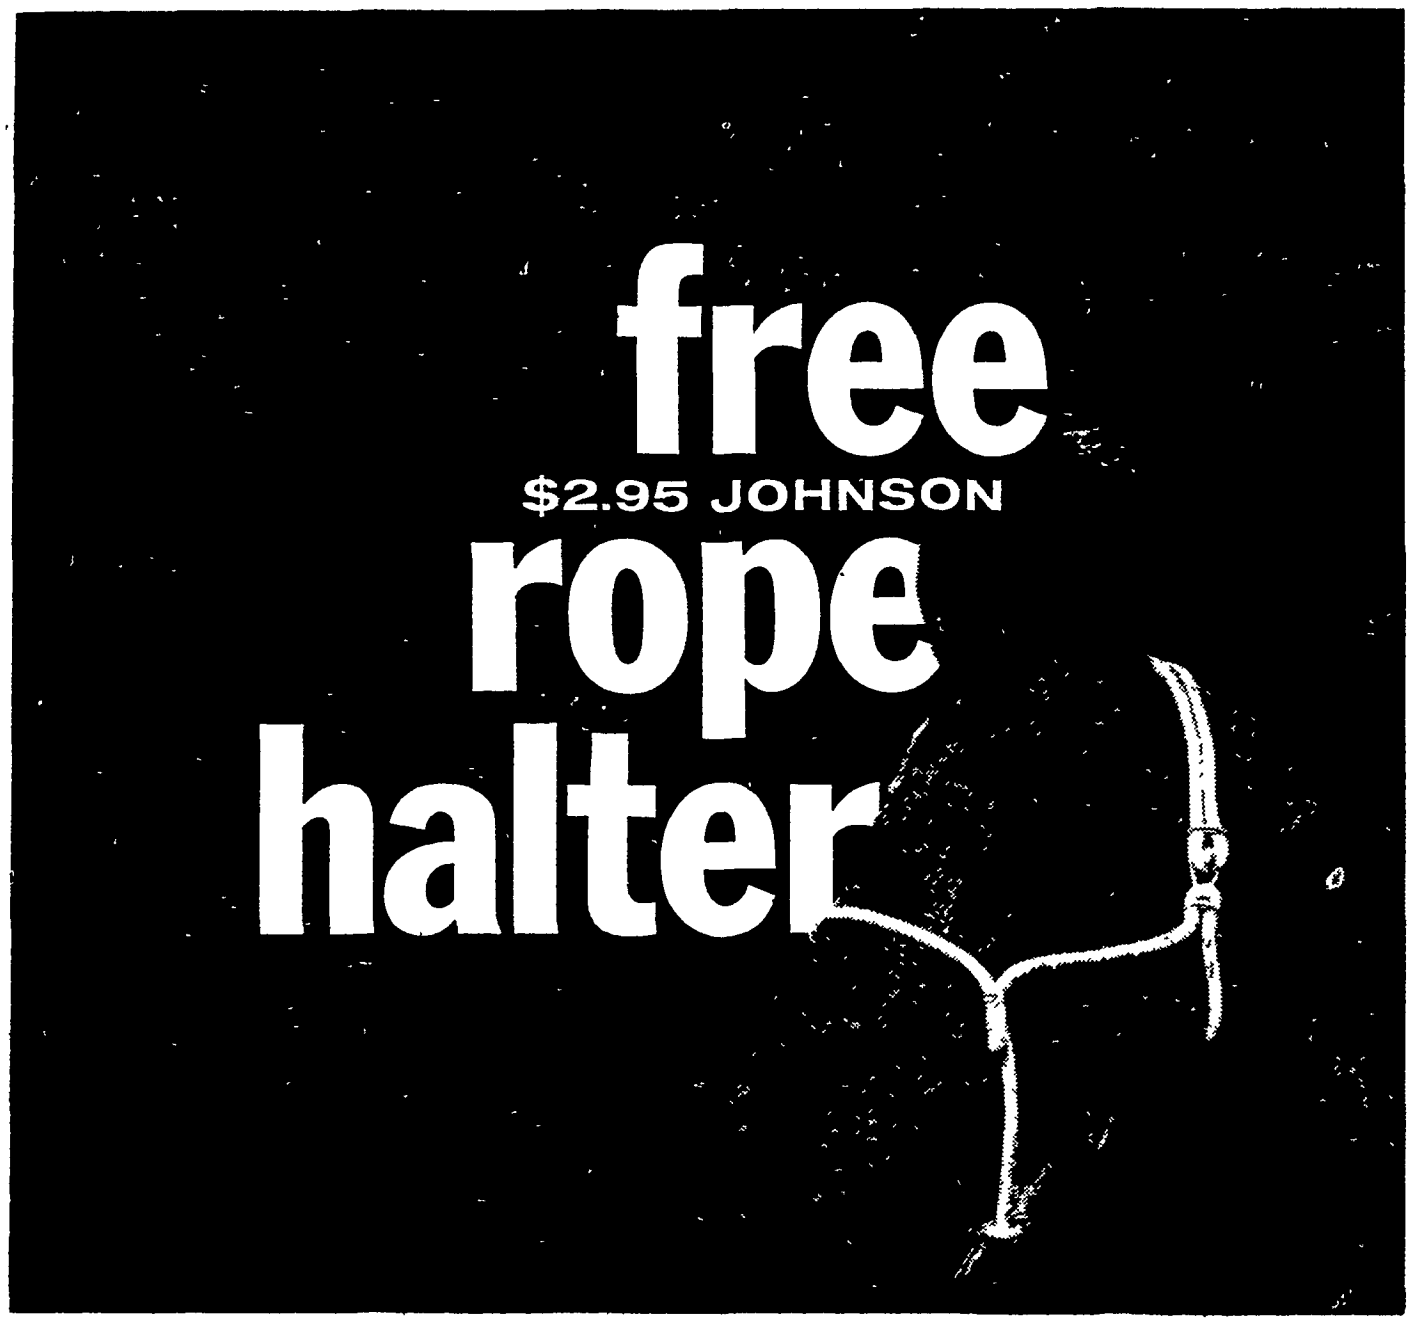
NEPPCO officials will also approach other regional poultry organizations throughout the United States in the hope they will cooperate in their areas, with the possibility that the summarization can be national in scope

● ASCS

(Continued from Page 1)

of conservation practices on farms containing 400 million acres

Since ACP was established in 1936, American farmers have built more than a million and a half miles of terraces along the slopes of 29 million acres, USDA said This has been an important addition to the continuing efforts toward effective erosion control and soil and water conservation goals



WITH COUPONS FROM RED ROSE HORSE FEEDS

Every stable needs rope halters, and as an introductory offer you can get famous Johnson Halters free. Specially constructed of a heavier braid, this Johnson Cotton Halter is exceptionally strong and safe. Soft and pliable, it resists shrinkage and won't twist or kink. Guaranteed against breakage for one year. Sizes to fit horses or ponies and foals. This $2.95 value is yours free, with ten coupons from bags of Red Rose Horse Feeds.

Red Rose makes a complete line of horse feeds . . . from basic ration to complete, balanced feed, with all the nutrients horses need, to powerful supplements that supply the extra vitamins and minerals you want for special requirements.

Red Rose feeds offer you the benefits of 125 years of experience, research and quality control to bring out the best that's bred into your horses. And they are made fresh daily throughout the East.

Try Red Rose feeds . . . and get your Johnson rope halters. If you don't know the location of your Red Rose dealer, write us: Box 1327, Lancaster, Pa.

American agriculture provides the base for nearly 12 million jobs and thousands of businesses. Farmers and their families spend about 40 billion dollars a year for goods and services

● Farm Prices

(Continued from Page 1)

vanced a dime to $17.90, calves advanced a dollar to $30 80 and sheep prices were steady at $6 80. The average of milk cow prices, at $320.00 per head, was $5 00 over the previous month and a new all time high.

With the exception of soybeans, which were a nickel below the previous month, all grain prices showed increases. Corn and rye were up a nickel per bushel, oats up 4 cents, barley up 7 cents, and wheat up a cent Price of corn at $1 56 per bushel, was the highest since September 1956

Offsetting the favorable advance for dairy and poultry prices, was a substantial increase in prices paid by livestock and poultry farmers for feed. The price of laying mash was up 9 percent from a year earlier while the cost of 20 percent dairy feed was up 7 percent.

The index of prices received, a measure of the change in prices received by farmers, was 260 percent of its 1910-14=100 percent base. This compares with 258 a month earlier and 234 a year ago.

U. S. PRICE INDEX DOWN TWO POINTS

During the month ended September 15, the Index of Prices Received by Farmers in the U S. declined 2 points (1 percent) to 270 percent of its 1910-14 average. Sharply lower prices for hogs and soybeans were mainly responsible for the decline. Limiting the decrease were higher wholesale milk and egg prices. The index was 8 percent above September 1965.

The Index of Prices Paid by Farmers for Commodities and services, including Interest, Taxes, and Farm Wage Rates, increased 2 points (⅔ percent) during the month to a new high. At 337, the index was 5 percent above a year earlier.

With prices of farm products lower and prices paid by farmers higher, the Parity Ratio declined 1 point to 80.

Crop Roundup

RAIN CONTINUES TO HINDER FIELD WORK

For the second week in a row, Pennsylvania farmers were unable to accomplish much field work because of rains which lasted nearly all week, according to the State Crop Reporting Service. Field work was mainly limited to silo filling between showers. Soil moisture supplies are considered adequate for present requirements in practically all sections of the Commonwealth. In some areas, where heaviest rainfall has occurred, fields are very muddy, and reports indicate a surplus supply of soil moisture.

CORN

Silo filling continued when possible during the week, and is about 70 percent completed throughout the State. Some frosted corn has been ensiled, with other frosted corn due to go into silos this week. Nearly 40 percent of the State's crop is still not mature, and further frost damage is possible.

SMALL GRAINS

Although weather conditions hindered the planting of barley and wheat, the rain was very beneficial to the early plantings. Most early fields that are up have very good stands, and are making good growth. Barley sowing is nearly 75 percent completed, and should be completed shortly if weather conditions permit.

HAY AND PASTURE

Recent rains improved the condition of hay fields, but were unfavorable for hay making. Most farmers who harvest hay fields again will make silage, rather than gamble with uncertain weather. Pastures have greened up considerably, but need warm weather to improve growth. The amount of feed being obtained from pasture is normal to below normal in most areas.

POTATOES AND TOBACCO

Wet fields have kept most potato growers from harvesting late potatoes, but as soon as soil conditions permit, digging should get into full swing. Yield and size are better on the late crop, since growth has been stimulated by recent rains In many areas of the State, vines are still green and growing, with vine killer not taking effect because of the weather conditions. Tobacco cutting is nearly completed in Lancaster County and should be finished this week Earlier rains helped the late crop considerably. Most reports indicate that the crop is curing well.

Diverted Acres May Be Grazed Starting Oct. 1

Any of the approximately 590 Lancaster County farmers participating in the 1966 commodity diversion programs may now start grazing diverted acreage, according to county ASCS chairman Fred G. Seldomridge.

With the end of the six-month, no-grazing provision October 1, there will be no loss of program benefits for those who graze their diverted acres

However, Seldomridge cautioned, this program relaxation regarding the use of acreage applies only to grazing the acres diverted from commodity production Hay on such acres still may not be harvested

Land diverted under the Conservation Reserve Program may not be either grazed or harvested through the whole year

Let's face it! Our real problem is not the "high cost of living" — it's "the cost of high living"

STEER SHOW

Hosler Hereford Gets Grand Champion Title

The Manheim Fair steer show Wednesday evening was won for the second consecutive year by a Hereford. Last year, the Hereford win at Manheim decided the season's Angus-Hereford deadlock (Angus steers had won at the Ephrata and New Holland Fairs, and Herefords at Lampeter and Solanco), but this year the top steer titles favored the Angus 3 to 2 Reserve titles this year are in the same proportion, and also favor Angus steers.

Showing the champ this year was Michael Hosler, 17-year-old son of Mr. and Mrs. Mark W. Hosler of Manheim R3. Mike, a senior at Manheim Central High School, showed his 950-pound, Colorado-bred

DAIRY SHOW

Hershey Holstein Grand Champion At Manheim

A two-year-old cow, Hershvale Supreme Hettie, shown by Donald Hershey of Manheim R2, captured the grand champion breed title at the Manheim Fair Thursday night. Hettie, a homebred daughter of Sheffield Supreme Max, took the vote of show judge Don Seipt, Holstein breeder from Easton, Pa, for best udder in the show. She was also named senior champion.

Two-hundred and ten days into her present lactation, Hettie has produced 12,400 lbs. of milk and 410 lbs. of fat to-date.

The junior champion Holstein title went to a junior yearling shown by Burnell Buchen of Manheim R3. Buchen's junior yearling also got the judge's nod for 4-H and

What's New in Feeding Cattle?

Ful-O-Pep Cattle-izer Beef Supplement

An entirely new concept in cattle nutrition opens up new profit possibilities for cattlemen everywhere. Based on a whole new principle in feeding, Ful-O-Pep Cattle-izer Beef Supplement changes the proportions of organic acids produced in the rumen. As a result, up to 20% more energy is available to the animal, as compared to the same amount of regular feed without the new concept.

This extra energy means faster gains, less feeding time to market, and considerable lower feeding costs. For thousands of cattlemen, it means extra profits.

Try the new concept soon.

HOG SHOW

Market Hog And Sow Titles To Nestleroth

Mark F. Nestleroth, Manheim R3, had the champion market hog and champion sow at the Manheim Farm Show Wednesday.

Best sow and litter title went to Jay Fisher, Manheim R1, while Nestleroth showed the first place junior boar, and Marlin Shearer of Mount Joy R2 had the best senior sow.

Judge for the swine contest was Conrad Grove, manager of Soleil Farms Inc, Chester County Angus breeders

Winners by classes were:

Lightweight market hogs, 1, Curt Diffenderfer, Manheim R3; 2, Jay Fisher, Manheim R1; 3, Donna Nissley, Manheim R3.

Heavyweight, 1, Nestleroth (champion); 2, Fisher; 3, Allen Hess, Manheim R3.

Pen of three lightweights, 1, Diffenderfer; 2, Allen Hess; 3, Randy Hess, Manheim R3.

Junior boars, 1, Nestleroth; 2, Carl Siegrist, Lititz R3; 3, Jay Fisher.

Junior sows, 1, Nestleroth; 2, Jay Fisher; 3, Jim Risser, Manheim R4.

Senior sows, 1, Marlin Shearer, Mount Joy R2, 2, Nestleroth; 3, Siegrist.

DAIRY SHOW

(Continued from Page 8)

FFA champion.

Reserve grand champion was a six-year-old cow, also owned by Hershey.

Marilyn Harbold, daughter of Mr. and Mrs. Ray Harbold of Elizabethtown R1, took first place in the showmanship class, while her sister Marlene was named master fitter. Susie Kauffman, daughter of Mr. and Mrs Robert H. Kauffman, also of Elizabethtown R1, was a close runnerup in the showmanship division, and Karen Brubaker placed second in fitting.

Winners by classes were:

Junior calf — 1, Susie Kauffman, 2, Marlene Harbold; 3, Karen Brubaker.

Intermediate calf — 1, Raelene Harbold: 2, Marilyn Harbold, 3, Lester Gerhard

Senior calf — 1, John Nissley

Junior yearling — 1, Burnell Buchen, 2, Ed Donough

Senior yearling — 1, Clayton Nissley; 2, Harold Shenk; 3, Donald Hershey; 4, Donough.

Two-year-old cow — 1, Hershey, 2, Joe Wivell.

Three-year-old cow — 1, Shenk

Aged cow — 1, Hershey; 2, Hershey

John S. Shelly, Manheim R1, was chairman for the Fair's dairy show.

SHEEP SHOW

Meck Wins Best Sheep In Show Title

Two of the four sheep classes judged Wednesday at the Manheim Farm Show were won by Ronald Meck, Reinholds R1 Meck also won the best fitted and best of show titles with a Shropshire lamb He also had the first place ewe.

Jesse Miller, Manheim R4, had the first place entry in ram lamb class, and Steven Miller, Manheim R4, won the ram class.

Winners by class were:

Ram lamb, 1, Jesse Miller, Manheim R4; 2, Rick Fenstermaker, Manheim R2.

Ewe lamb, 1, Ronald Meck; 2, Fenstermaker, 3, Jesse Miller.

Ewe, 1, Meck; 2, Jesse Miller; 3, Barry Miller, Manheim R4.

Ram, 1, Steven Miller, Manheim R4

Judge for the event on opening day was Conrad Grove manager of Soleil Farms Inc. of Pottstown

Tractor Driving Titles To Boll And Snavely

Wins in the junior and senior divisions of the Manheim Fair tractor driving contest Thursday went to Jay Boll, Manheim R4, and Jerry Snavely, Lititz R1, respectively

Twenty-nine youths, 14-18 years old, competed in the junior contest, while four adults fought for the senior title.

First-place winners, Boll and Snavely, were awarded trophies last night at the Fair's general awards presentation.

Placings were:

Junior division — 1, Jay Boll, Manheim R4 2, David Merkey, Ephrata 3, Jay Smoker, Ephrata; 4, Glenn Nolt, Manheim R1, and 5, John Nissley, Manheim R1

Senior division — 1, Jerry Snavely, Lititz R1, 2, Jay Foreman, Lititz R1, 3, Dale Greiner, Manheim R4; 4, Earl Fahnestock, Manheim R4

Macaroni Favorites . . .

SPENCE

The favorite, familiar shapes of macaroni products combine with other flavorful foods in these recipes. Meals featuring macaroni products are especially enjoyable on late summer or early fall days. Macaroni, spaghetti, and noodle recipes fit into your menus at the seashore, beside the outdoor grill, at buffet dinner . . . anywhere, anytime.

This economical casserole contains the macaroni product, egg noodles You can substitute any frozen vegetable for the mixed vegetables listed as an ingredient below. For a delightful flavor change, sprinkle Parmesan cheese on top with the bread crumbs.

SCALLOPED CHICKEN AND NOODLES

- 8 ounces medium egg noodles
- 1 can (10½ ounces) condensed cream of chicken soup
- ¾ cup milk
- 2 cups chopped cooked chicken
- 1 package (10 ounces) frozen mixed vegetables, thawed and drained
- ½ cup chopped onion
- ¼ cup chopped pimiento
- 1 teaspoon salt
- ½ teaspoon pepper
- ¼ cup dry bread crumbs

Cook noodles in boiling salted water until tender, yet firm, 3 to 4 minutes. Drain. Blend together soup and milk in saucepan; heat thoroughly. Combine chicken, mixed vegetables, onion, pimiento, salt and pepper in large mixing bowl. Stir in noodles and soup mixture.. Turn into 2-quart casserole. Sprinkle bread crumbs evenly over mixture. Bake in preheated 425 degree oven 20 to 25 minutes, or until bread crumbs are lightly browned. Makes 4 to 6 servings.

* * *

High on the list of favorite main dishes, a macaroni loaf is tops in flavor and excellent served either hot or cold. A delicate golden cheese sauce can complement each serving, but the flavor of the loaf itself is enough without garnishment.

MOLDED TUNA-SHELL LOAF

- 8 ounces small shell macaroni
- 4 eggs, beaten
- 2 cans (about 7 ounces each) tuna, drained
- 2 slices white bread, crumbled
- ½ cup sliced pimiento-stuffed green olives
- 1 teaspoon garlic powder
- 1 can (10½ ounces) condensed cheese soup
- ½ cup milk

Cook macaroni in boiling salted water 5 minutes. Drain. Thoroughly combine eggs, tuna, bread crumbs, olives and garlic powder. Blend together cheese soup and milk in separate mixing bowl. Add to tuna mixture with macaroni, stirring until well mixed. Turn into well-greased 5 x 9-inch loaf pan. Bake in preheated 350 degree oven 50 to 60 minutes, or until firm and golden brown. Immediately loosen edges and invert onto serving plate. To serve, cut loaf into slices. Makes 4 to 6 servings.

* * *

PORK VEGETABLE STEW

- 1¼ pounds boneless pork shoulder, cut in cubes
- 1 medium onion, sliced
- 1 cup sliced carrots
- 1 can (10½ ounces) condensed consomme
- 1 cup water
- 1½ teaspoons marjoram
- 1 teaspoon salt
- ¼ teaspoon garlic powder
- 1 package (10 ounces) frozen cut green beans
- 8 ounces elbow maraconi

Brown pork in large saucepan. Stir in onion, carrots, consomme, water, marjoram, salt and garlic powder. Bring to boil, reduce heat, cover and simmer 45 minutes, or until pork is tender. Stir in green beans and macaroni; cover and simmer 10 to 15 minutes longer, or until macaroni is tender, yet firm, stirring occasionally. serve hot. Makes 4 to 6 servings.

CRAB-MACARONI COOLER

- 8 ounces elbow macaroni
- 1 can (about 7 ounces) crabmeat, darined and flaked
- 4 hard-cooked eggs, cut in eighths
- ⅓ cup chopped celery
- ⅓ cup chopped onion
- ¼ cup chopped parsley
- 1 teaspoon salt
- ½ teaspoon pepper
- 1 cup mayonnaise or salad dressing

Cook macaroni in boiling salted water until tender, yet firm, 5 to 7 minutes. Drain and cool completely. While

4 Flying Farmer Chapters Honor L. L. Logan

Mr. and Mrs. Harry Wilson, Nottingham, recently flew into West Chester Airport to call upon Mr and Mrs. Leebert L. Logan, 1204 Paoli Pike, West Chester The purpose of their call was very much a surprise to the Logan's.

The Wilson's were representing the Flying Farmers of four chapters which Logan organized for International Flying Farmers in recent years—namely, New Jersey, Delaware, Maryland and Virginia. A three-piece luggage set was presented to the Logan's for their service to these chapter members during Logan's ten years as Regional Director of International Flying Farmers.

Logan retired as Director August 1, 1966. Harry Wilson was elected to replace him. Mrs. Wilson is still reigning Queen of the Pennsylvania Flying Farmers and is immediate Past Queen of International Flying Farmers.

The presentation was to have been a surprise for Logan at a joint meeting of the four chapters at Lindenwold, N.J., September 18th, but Logan was unable to attend that meeting since he was recovering from recent surgery.

CROP NEWS

FRUIT & VEGETABLES

Most late varieties of apples are sizing nicely, and picking should reach peak soon. Some growers report Staymans are splitting as a result of abundant rainfall. Harvest of grapes for processing started during the week in Erie County. Quality of Concords is very good in most sections this year. Tomato picking is nearly completed in all areas Ripening has been slow because of cool wet weather, and labor shortages. Some growers in the south are salvaging green tomatoes for relish.

● N. H. Hog Show

(Continued from Page 6)

with a Duroc.

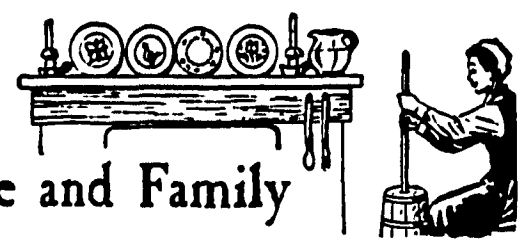
Ruoss, in his fourth year in 4-H, is an eighth grader at Conestoga Valley Junior High School He also won the fitting title, while best showman went to Robert Fisher, East Earl R1

Reserve champion honors were won by Mary Louise Fisher, East Earl R1

Judge for the show was Lester Burdette, Penn State Extension livestock specialist

Placings were Robert Fisher, third, Elvin Lapp, Kinzer R1, fourth; Eben Lapp, fifth, Mike Smucker, Ephrata R2, sixth, Eric Zeiset, East Earl R1, seventh; and Bill Fisher, East Earl R1, seventh.

For the Farm Wife and Family



Ladies, Have You Heard? . . .

By Doris Thomas, Extension Home Economist

THOMAS

IT'S WORTH KNOWING

You walk at least 4 miles and spend 25 hours of your time during one year in making just one bed by the common dash-around method Save time and energy by making one side completely, then the other side

People who work with speed and efficiency usually have a plan They organize their work in a logical sequence and do various jobs when they are timely Defrosting the refrigerator before you do weekly shopping is one example. The job is simpler when food supply is low

To get full efficiency from your washer, use it every day or two, instead of 1 day a week. You prevent soil and grime from damaging fabrics when you wash them frequently, soon after they are worn When you wash often, you need fewer clothes This point is especially important when there are small children in the family. Daily washing is easier on the hot water supply and less tiring to you

Two Kinds of Rayon Marketed

The older type rayon is weak when wet You must handle it carefully during laundering It also has poor dimensional stability, and you may find it difficult to press back into the correct shape

The new high-modulus or high-strength rayons are strong when wet Some trademark names for the new high-strength rayons are Avril, Avron, Corval, and Topul rayons

Sewing With Laminates

Laminated fabrics have a thin layer of polyurethane foam bonded permanently to one side of fabric or between fabric layers. When you sew with these laminates, it's worth knowing . .

You don't need interlining or interfacing.

Your pattern should be simple and require little fitting or tailoring

You won't have to shrink fabric.

Place pattern on right side of fabric, grainline perfect. When folded, place foam sides together

Place pins at pattern markings and mark with chalk Use medium needle, medium-long stitch, and small amount of pressure

● Best Carcass

(Continued from Page 1)

weight in vital cuts — hams and loins — according to association president John H. Henkel. A quality grade of 1, 2, or, 3 was also assigned to each carcass, signifying unacceptable, acceptable, and excellent.

Another Yorkshire gilt, shown by Lebanon Countian Ed Ressler, placed second. Although the Ressler pig had a slightly higher ham-loin percentage, a lower quality score caused it to be rated below the champion.

In the on-foot, live evaluation contest, John Henkel of Willow Glen Farm, Strasburg R1, topped the 14 other judges; Mrs Carol Henkel, also of Willow Glen Farm, was runnerup

Other placings in live evaluation were: 3—James Martin, 4—Elwood Houser, 5— Leon Arnold; 6— John Little; 7—Kenneth Hershey, 8—John Eby, 9—Larry Arnold; 10—Warren Leininger, 11—Harold Boyd; 12—Mary Martin; 13—Laverne Mentzer, 14—Terry Griswell, 15—Robert Armstrong

First six scorings in carcass show: 1—Leon Arnold, 206-pound gilt; loin eye 5.6 sq. in.; ham-loin 42.7% of carcass weight; quality score 3

2—Ed Ressler, 214-pound gilt; loin-eye 5.4 sq. in.; ham-loin 43.2%; quality score 2.

3—John Strawbridge, 212-pound gilt; loin-eye 6 6 sq. in.; ham-loin 45.1%; quality score 1.

4—George Cogley, 204-pound gilt; loin-eye 5.8 sq. in.; ham-loin 41 2%; quality score 2

5—Robert Armstrong, 212-pound gilt; loin-eye 5 2 sq. in., ham-loin 41.2%; quality score 2

6—Willow Glen Farm, 198-pound barrow; loin-eye 4 7 sq in; ham-loin 41 0, quality score 3

● DHIA

(Continued from Page 1)

D. Hiestand herd at Bainbridge R1 She produced 19,234 pounds of milk and 875 pounds of butterfat in 305 days

Highest monthly butterfat average was scored by the Hiram S. Aungst herd in Elizabethtown R1. Aungst's 38 registered Holsteins averaged 1,570 pounds of milk and 61 pounds of butterfat.

Second high herd in August was owned by Robert F. and Joan B. Book, 11 South Hershey Avenue, Bareville. This herd of 33 registered Holsteins averaged 1,522 pounds of milk and 60 pounds of butterfat.

● Tobacco

(Continued from Page 1)

million pounds above the average for the past five years, USDA said.

Domestic use, the report continued, accounts for nearly all of the disappearance of U S cigar filler types. Although most of this is used in cigar manufacture, a sizable quantity of Pennsylvania type is used in scrap chewing. The Pennsylvania tobacco is also one of the major components of cigar binder sheets, USDA said

Several weeks ago, the state crop reporting service noted an upward estimate of 50 pounds per acre for Type 41 tobacco, bringing the level to a predicted 1700 pounds. This upgraded prediction was attributed to timely rainfall, but still left the county tobacco crop nearly 100 pounds per acre below the 1960 64 yield average.

New John Deere 237 Corn Picker

raises the speed limit in high-yield corn

Shift up! Pick at speeds up to 5 mph, even when yields run well over 100 bushels. Long, tapered gatherers and high inside shield, funnel stalks right in. Even tangled stalks seldom escape three roller-type gathering chains. There's new gathering and snapping speed. And the 237's spiral snapping rolls cut shelling loss in half.

Faster elevators with higher flights move corn up fast. Trash goes too, aided by new rotating trash paddles. New husking rolls—cast-iron spirals against serrated rubber—peel husks, pull trash through. You pick clean. See the new 237 soon. Ask about the Credit Plan.

STEER SHOW

(Continued from Page 8)

steer to the top of the 4-H Hereford class, and then went all the way in the FFA-4-H combined competition.

The reserve title went to another 4-H showman, Gary Neff of Mount Joy R2. Neff's Old Home Manor-bred Angus stood second to Hosler's Hereford in the 4-H competition, but was the show's top Angus.

FFA champions were shown by Richard Gruber, Elizabethtown R3 (Angus), and Robert Donough, Mount Joy R2 (Hereford). Jay Hess, Manheim R3, had the only Charolais entry.

SHOWMANSHIP

Junior division — Judy Buckwalter, Lititz R3; Donald and Donna Gall, both of Manheim R1.

Senior division — Robert Long, Manheim R4, Robert Donough, and Hosler

FITTING

Master fitter, Jay Nissley, Mount Joy R2; runnerup, Hosler; and third, Marion Long, Manheim R4

Judging the 46 head show was Conrad Grove, manager of Soleil Farms, Inc., Pottstown.

ABC Open House For Dairymen

Lancaster County dairymen and their families are invited to attend the annual fall Open House at Atlantic Breeders Cooperative headquarters, Sunday, October 9 Visiting hours are 1 - 4 p m

Guests will have an opportunity to view the stud sires now in service, see exhibits and demonstrations of semen processing and other equipment, and discuss breeding programs. During the past year, 11 dairy and six beef sires have been added to daily service through Atlantic Headquarters personnel will be on hand to answer questions and serve as guides.

Free dairy refreshments will also be served

A. B. C. headquarters facilities are located three miles northwest of Lancaster along Rt 230, just west of the junction with Rt. 72.

New **HIGH CAPACITY AUTOMATIC BUNK FEEDER**

GIANT CAPACITY
A powerful 9 inch auger is offset within a giant, fully enclosed 12-inch steel hood. This unique design provides a reservoir for silage and feeds the full length of the feeder, greatly increasing the capacity and speed with which feed moves to the livestock Handles the output of the largest silo unloader with ease.

FEEDS ENTIRE HERD AT ONE TIME
Feed is augered the full length of the enclosed hood and is then automatically dumped into the feeding bunk, providing equal rations to each head of livestock *at the same time.* No cattle crowding No spilled and wasted feeds. When feed is dumped, the hood closes automatically and repeats as often as needed.

SILENT, CLOG-PROOF OPERATION
Powerful 9-inch auger never touches the metal hood; eliminating metal-to-metal friction and providing the right clearance to prevent binding and clogging even when materials have high moisture content. Horsepower requirements are greatly reduced too.

LET US GIVE YOU COMPLETE DETAILS OF THE AMAZING VAN-DALE S-17 BUNK FEEDER

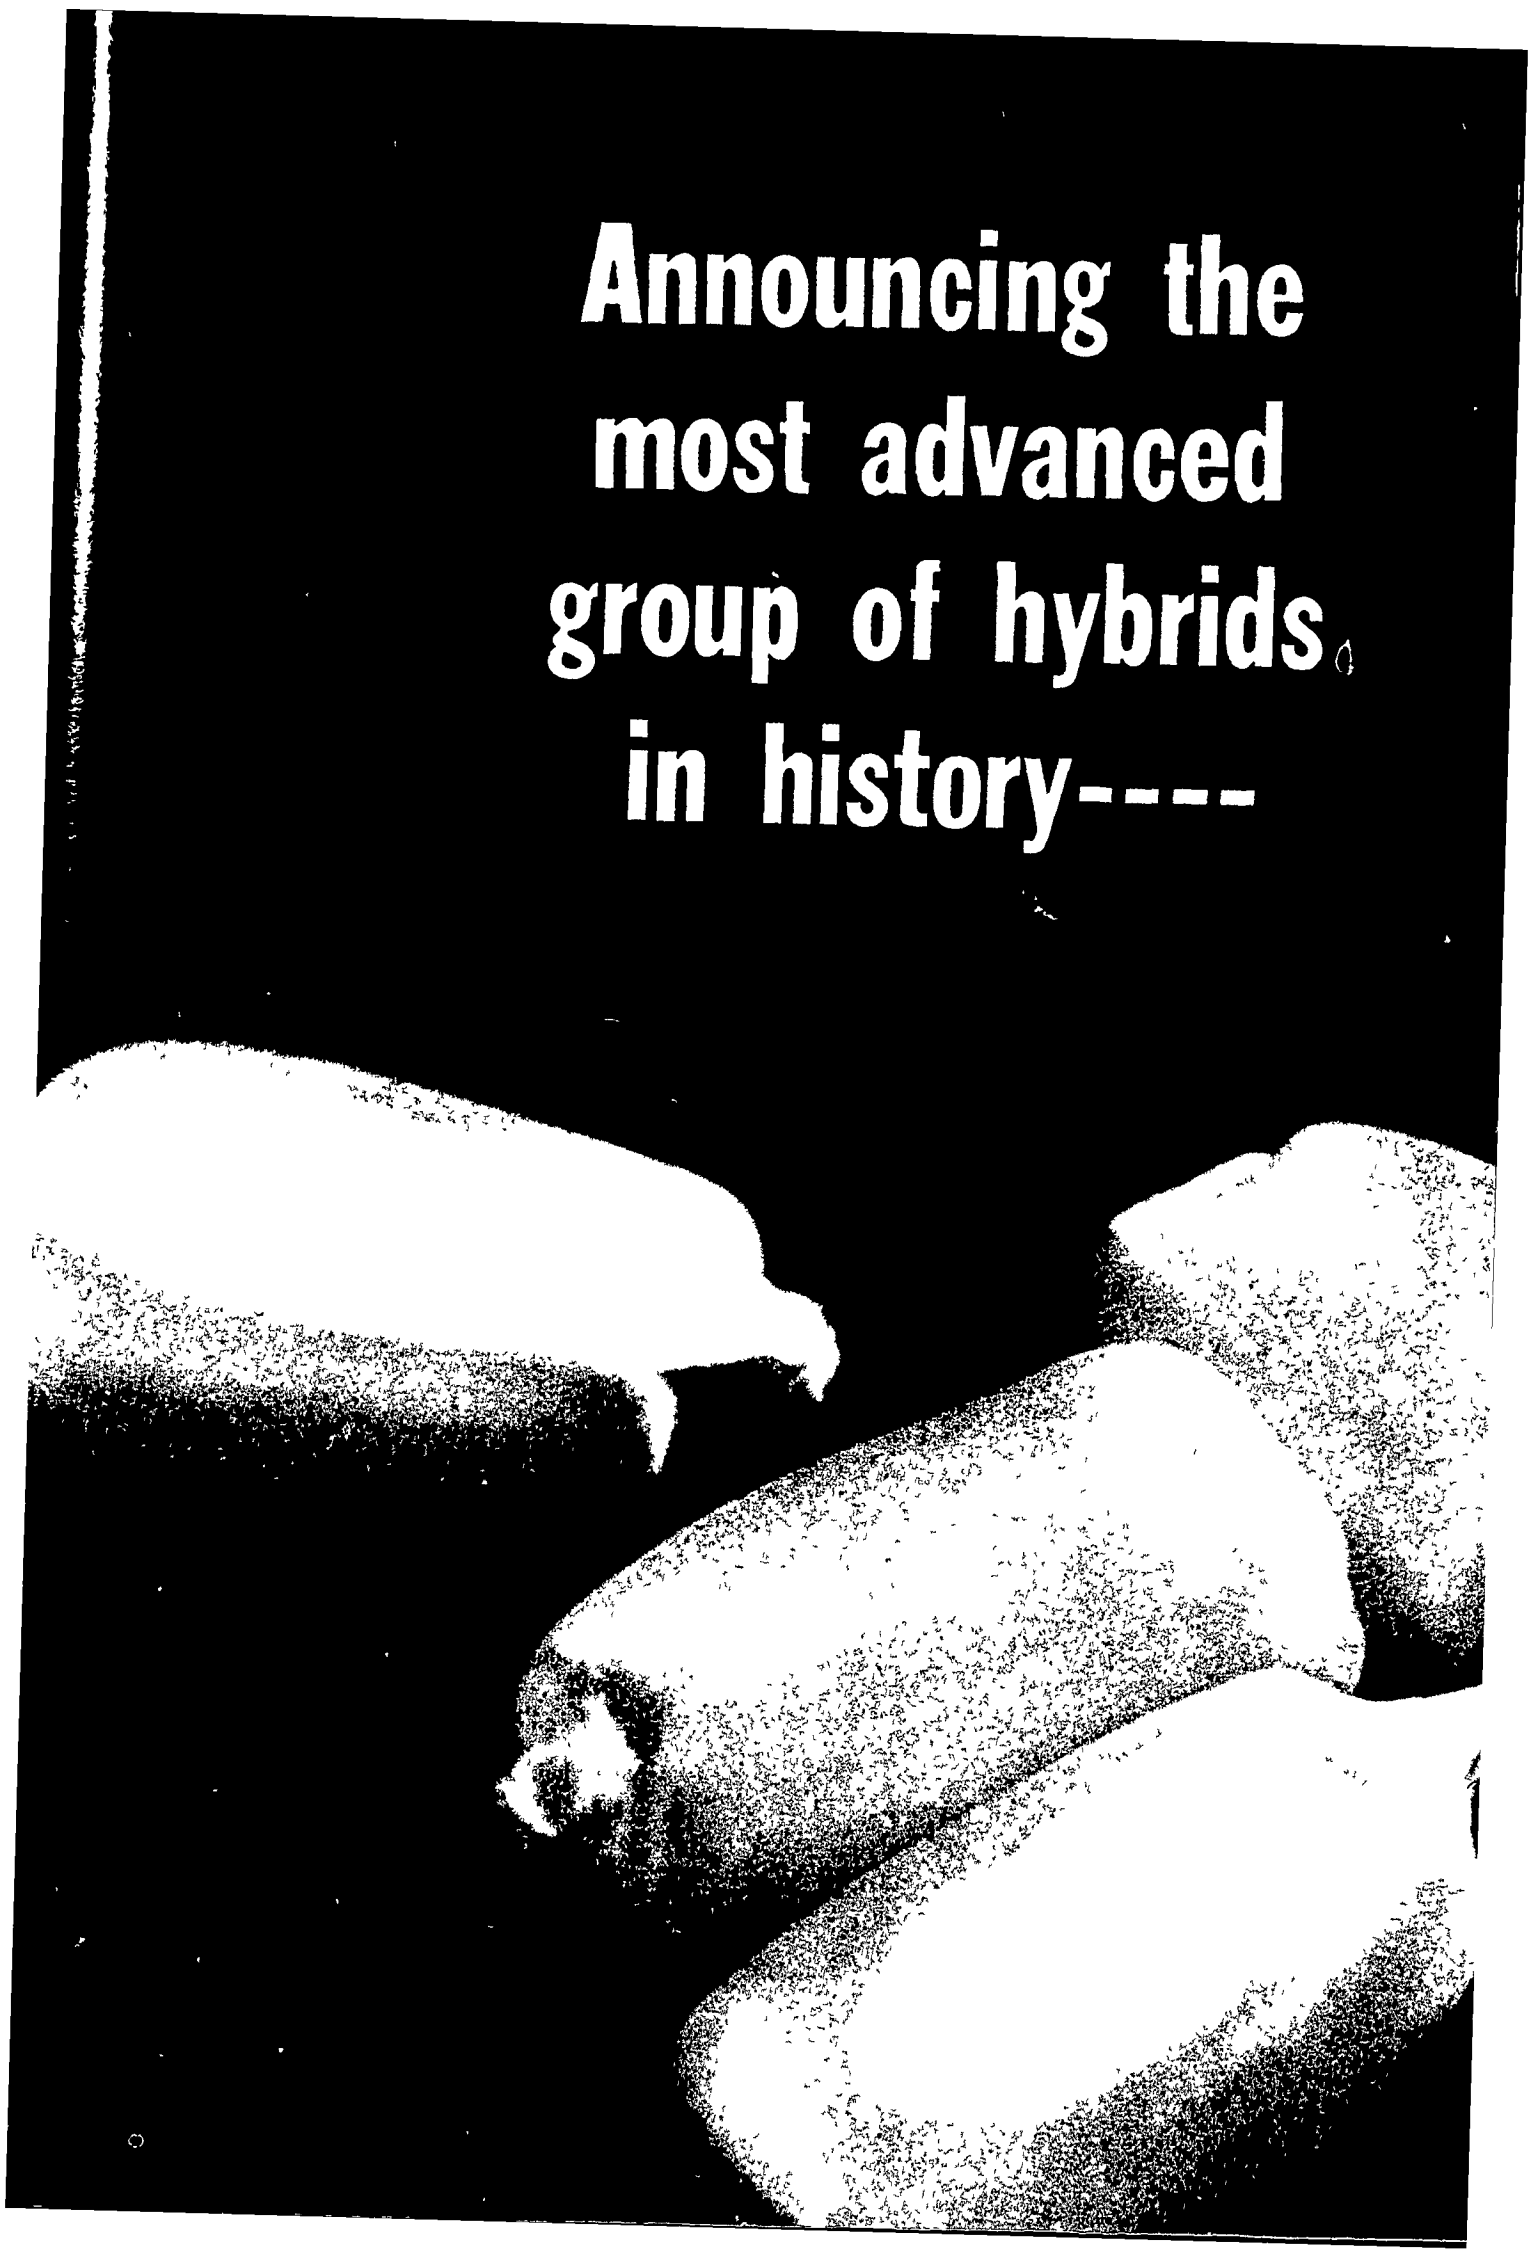
Announcing the most advanced group of hybrids in history----



From ZEA IIII Research comes ***NEW...***

ZEA IIII

FUNK'S G-HYBRID

Today, **Funk's-G has a new kind of hybrid seed corn for sale—**

New ZEA IIII Funk's G-Hybrids!

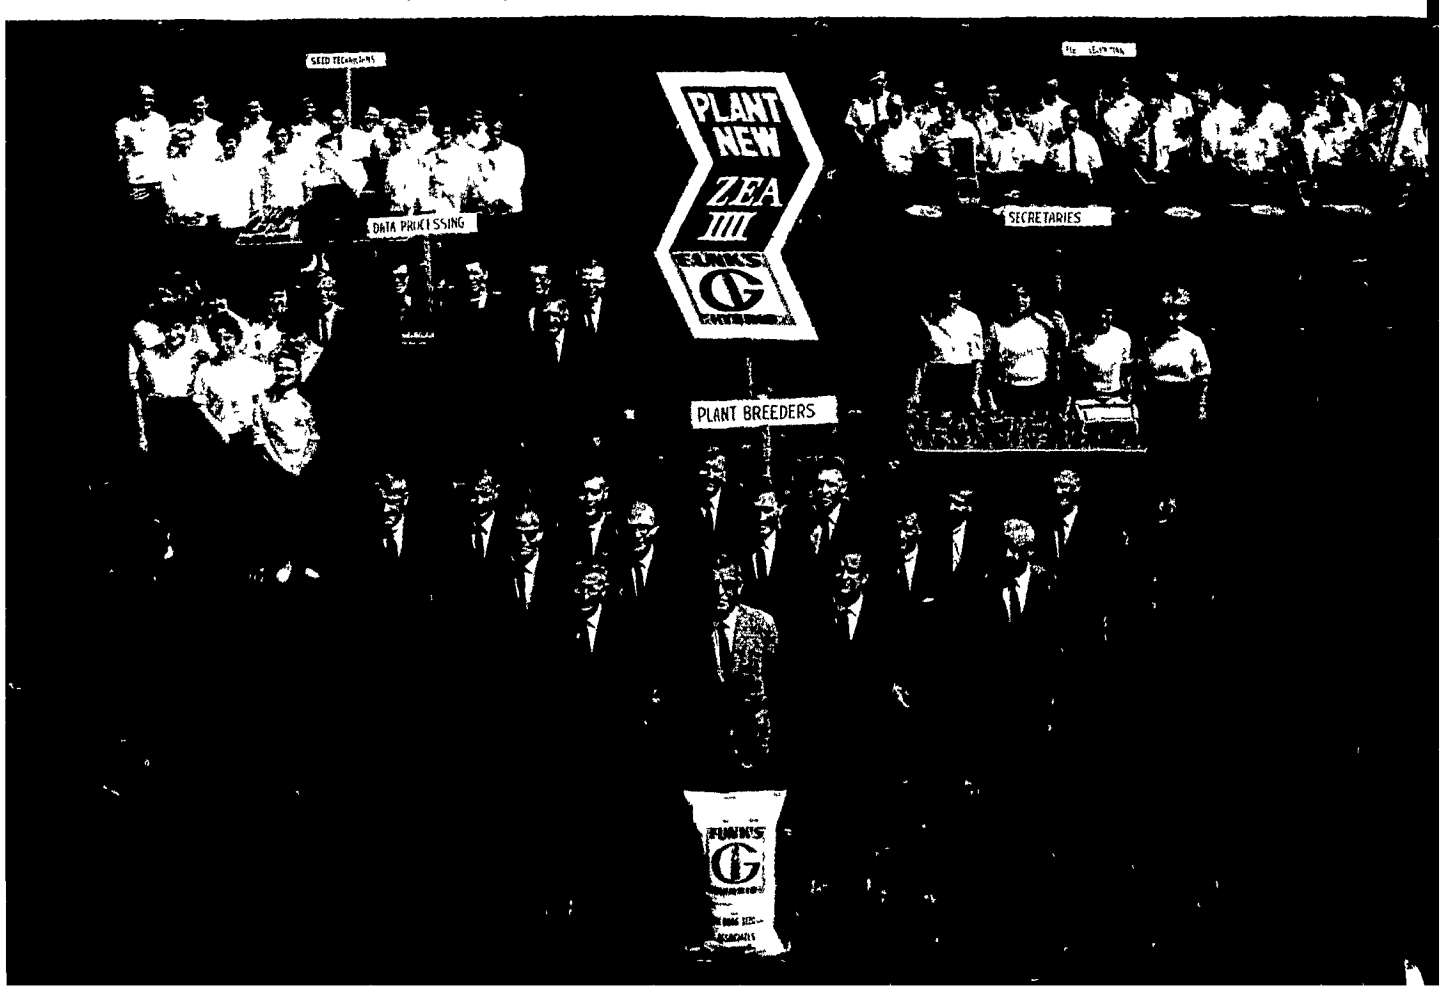
In extensive research tests, and on thousands of farms, these new hybrids have produced higher yields than *any* hybrids *ever* before.

ZEA IIII Funk's G-Hybrids are the product of the most massive research effort ever focused on the improvement of hybrid corn. To produce them, we greatly expanded our research staff and nationwide field laboratory facilities. We developed entirely new c breeding techniques. We harnes the vast potential of the electro computer to hybrid corn developme

The result is an extraordinary r group of single cross, special cross, a 4-way cross hybrids in the maturit you need. They are identified by a f numeral variety number such Funk's G-4641. A few are already be widely planted on farms—perha yours. For all the details about th great, new hybrids, turn page.

The new mark of ZEA IIII Funk's G-Hyb

The ZEA IIII research group, developers of new ZEA IIII Funk's G-Hybrids



PLANT

FUNK'S
G
HYBRID

PLANT NEW ZEA IIII

FUNK'S G HYBRID

It is fitting that we should call the results of this research effort ZEA IIII—ZEA for *Zea mays*, the scientific name for corn . . . IIII for the 4 great areas of corn breeding research which produced the extra performance factors in these great new hybrids . . .

I Unmatched Yield Power
II Proven for Narrow Rows and High Populations
III Rugged Dependability
IIII Highest Quality Grain

I- unmatched YIELD POWER!

No one knows how high yields *can* go with new ZEA IIII Funk's G-Hybrids. They have outdistanced all competition in comparisons on farms everywhere.

ZEA IIII researchers were given the assignment: "Put the highest possible yield potential into these new hybrids—not forgetting the other qualities necessary to make them superior in every way." They succeeded!

Without changing your present fertilizer rates or practices, you can produce higher yields with ZEA IIII hybrids.

But, of equal importance, ZEA IIII hybrids will respond more fully to any new corn growing practices you may begin using next year—or the year after.

Funk's G-Hybrids set the existing world corn yield record of 304.38 bushels per acre. We predict a new ZEA IIII Funk's G-Hybrid will top this!

FUN
HYB

ZEA IIII

Funk's G-Hybrids Will Bring A High Yield Smile To Your Face Too!

David Dorn (above), and his father Otto, chalked up a 202.38 bushel yield last fall—combined, weighed over the scales, and corrected for moisture. They used a new ZEA IIII Funk's G-Hybrid.

Their's was only one of numerous yield records made with these new hybrids—many over 200 bushels per acre. Literally hundreds were in the 150 to 200 bushel range.

Everywhere corn was grown last year, *the highest corn yields were made with the new single, special, and 4-way cross Funk's G-Hybrids.*

PLANT NEW ZEA IIII

FUNK'S G HYBRID

II-proven for narrow rows and high populations

New ZEA IIII Funk's G-Hybrids *are the right hybrids for narrow rows and high plant populations.*

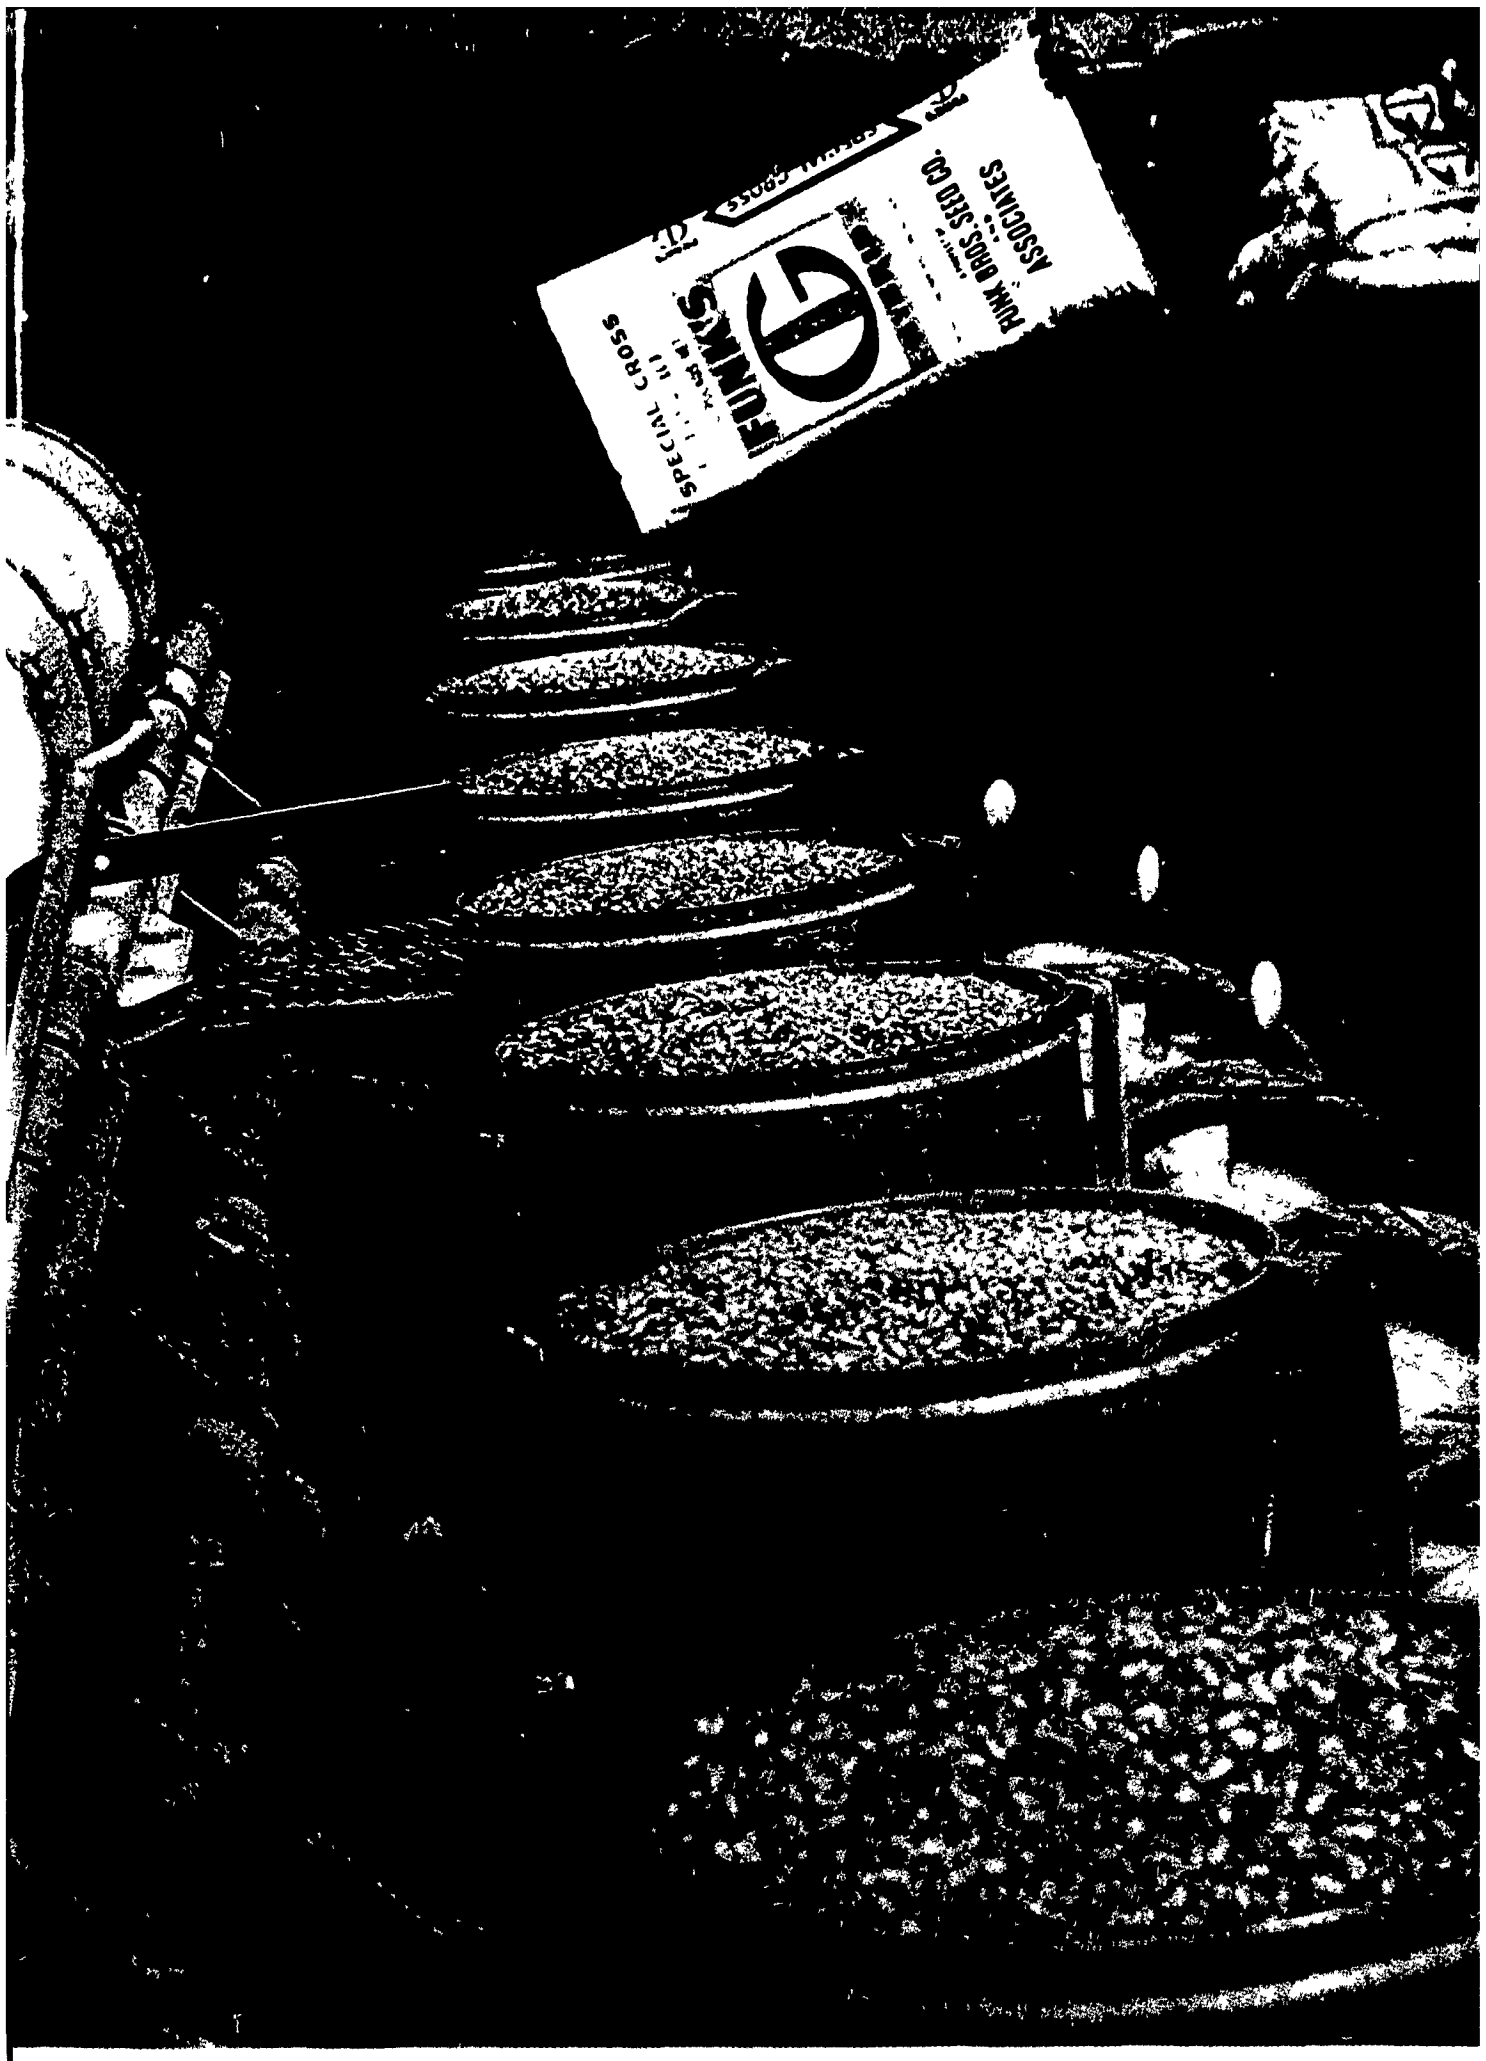
They have what it takes to make the *most* of your investments in new planting and harvesting equipment, more fertilizer, new corn production practices, which are coming thick and fast.

Funk's-G superiority under high plant populations is a vital force in raising profits per acre in corn growing. We found, long ago, that the best way to produce higher yields was to grow more plants per acre. But this took hybrids with the capacity to produce under more crowded conditions. Funk's-G research on hybrids for thicker planting, beginning in the '40's, produced our original High Capacity Funk's G-Hybrids. The unique performance of these hybrids produced the famed Trio of High Profit Practices:

1 Start with a high capacity FUNK'S G-HYBRID...
2 PLANT IT THICKER...
3 APPLY EXTRA FERTILIZER to feed the extra plants.

Farmers today are using this simple plan to as much as double their yields over a period of years—and now they'll have ZEA IIII Funk's G-Hybrids, better yet for narrow rows and high populations!

FUN
HYB



234 BUSHELS PER ACRE!

ast fall, Ralph Jones weighed the yield from 5 acres of his 450 cres He averaged 234 bushels per acre! The field was planted 30 inch rows The hybrid was of Funk's-G ZEA IIII breeding.

Ralph Jones is typical of America's corn growers who are profitably switching to Funk's G as they move to narrow rows and thicker plant populations They've found that it works

PLANT NEW ZEA IIII

FUNK'S G HYBRID

III-rugged dependability!

Today, more than ever, you want hybrids you can depend on to come through *every year* with good yields—even under adverse conditions. You want rugged standability. You want resistance to diseases, insects, heat, drouth, cool temperatures, and a host of other yield-reducing factors, in every hybrid you plant.

In the total research effort behind ZEA IIII hybrids, the yield-reducing factors common to your area were each carefully considered. Funk's-G developed whole new research facilities, put special task groups together to fight specific problems. New, higher levels of resistance to these problems were bred into each new ZEA IIII Funk's G-Hybrid.

One research group concentrated on the new stunt diseases of corn. Working in special field laboratories in Ohio and Louisiana, they have developed ZEA IIII hybrids with superior resistance to stunt virus and Maize Dwarf Mosaic in just 3 short years.

If your area has a special problem, Funk's-G is working on it—probably has solved it with new ZEA IIII hybrids.

FUNK'S G HYBRID

dable hybrids ever produced.

PLANT NEW ZEA IIII FUNK'S G HYBRID

IIII - highest quality grain!

Chaffy, diseased, insect damaged grain can be prevented. Many of the same bred-in factors which contribute to Funk's-G dependability also help produce high quality grain.

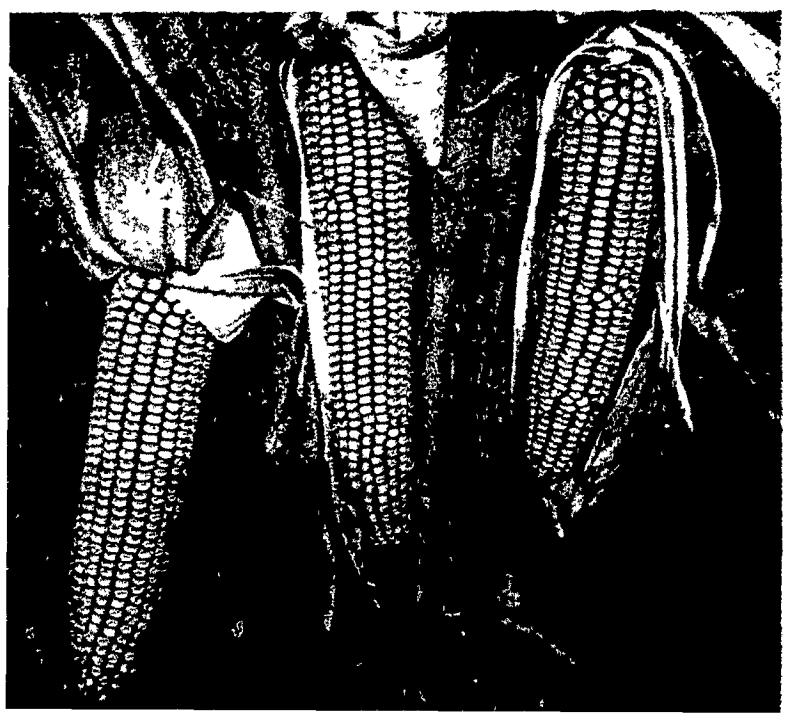
But there has been an *extra* margin of grain quality insurance in Funk's G-Hybrids through the years. This has been highlighted somewhere in the country nearly every fall. In 1965, it happened in the northern Corn Belt.

The two hybrids shown below grew side by side in northern Iowa. They were the same maturity, treated exactly alike. At harvest, the ZEA IIII bred Funk's G-Hybrid at left had a test weight of 56 pounds per bushel. The other hybrid weighed 46 pounds per bushel.

This was repeated on thousands of farms. Despite cold temperatures and excessive rain, Funk's G-Hybrids pushed on to make good yields of sound, quality grain.

New ZEA IIII Funk's G-Hybrids have high levels of resistance to major causes of poor quality, low test weight grain. They have grain quality insurance, bred in.

Remember—a ZEA IIII Funk's G-Hybrid has 4 numerals. A typical new ZEA IIII single cross is G-4641; a ZEA IIII special cross is G-4476; a 4-way cross ZEA IIII Funk's G-Hybrid is G-5757. You *may* be one of the fortunate ones to have ZEA IIII Funk's-G planted *this* year.



The New ZEA IIII Funk's G-Hybrids Are Here!

In Single, Special And 4-Way Crosses to Fit Your Exact Needs.

Don't Lose A Year!

Reserve your new ZEA IIII Funk's G-Hybrids now! (Supplies of some are limited.)

Remember: High Capacity Funk's G-Hybrids are consistently producing the highest corn yields-this year and every year!

PLANT NEW ZEA IIII FUNK'S G HYBRID

New Symbol of Excellence in Hybrid Seed Corn

This symbol is the mark of new ZEA IIII Funk's G-Hybrids, now available in the maturities you need to go with the latest corn growing practices. It is your guarantee of maximum performance in the hybrids you plant.
